

ABSTRACT

Topic: ONLINE BAKERY MANAGEMENT SYSTEM

Bakery management named by “Cutie Pie”. Online bakery management system allows users to check and purchase various bakery products available online. This consists of list of bakery products displayed in various categories and the user can browse through the items. User can add the selected items it to his shopping cart. User needs to register on the site before checking out. He can then login using same id password next time. Now he may pay through a credit card or cash on delivery. Thus, Online bakery management system the brings an entire bakery shop online, making it easy for both buyer and seller. The aim of proposed system is to develop an existing system with improved facilities. Existing system is mostly manual and requires a lot of human effort and time.
